1. Organization Overview

Name of Organization:

Sphere Style Boutique

Mission Statement of the Organization:

To deliver stylish, coordinated fashion experiences that empower customers to look and feel their best, through expertly curated outfits and personalized styling services.

Vision of the Organization:

To become a trusted fashion destination that inspires confidence and self-expression through accessible, trend-conscious style.

Target Audience of the Organization:

Sphere Style Boutique's website is designed to be showcased and used by fashion-conscious shoppers mainly aged between 14 to 45 who are interested in stylish outfit ideas and trend-forward clothing. In-store and online sales staff who use the system to recommend complete outfit combinations and match accessories to customers. Returning customers seeking seasonal collections, promotions, and new arrivals from the boutique.

History of Organization:

Sphere Style Boutique was established as a fashion boutique in the retail organization with a focus on organization, trend-forward clothing and professional styling services. This boutique was created to bridge the gap between high-street fashion and personalized styling experiences, offering customers a carefully selected range of clothing items, accessories, and seasonal collections.

Sphere Style Boutique operates as a clothing boutique and clothes retailer, using a Retail Outfit and Style Management System to support its sales and merchandising processes. Rather than functioning as a personal wardrobe tool, this system is designed to serve the retailer's needs, helping staff create outfit combinations from items available for sale, organize seasonal and promotional looks, and deliver tailored styling recommendations to customers in-store and online.

The proposed website serves as the digital extension of Sphere Style Boutique, supporting outfit planning, product showcasing, merchandising, and customer engagement through a modern, fully responsive online platform.

2. Website Goals and Objectives

Website Goals:

The Sphere Style Boutique website is designed to achieve the following specific goals:

1. Increase Online Engagement: Drive traffic to the website and encourage users to explore outfit collections, product catalogues, and seasonal lookbooks.

2. Showcase Outfit Collections: Display curated outfit combinations built from the store's available clothing items, organized by season, occasion, and style.

3. Promote Products: Highlight new arrivals, featured promotions such as Women's Day and holiday collections, and seasonal sales campaigns to encourage purchases.

4. Support Staff Recommendations: Provide sales staff with a digital tool to quickly suggest complete and coordinated outfits for customers based on occasion, style, season, and color preference.

5. Improve Customer Enquiries: Offer a structured and accessible enquiry form for customers to request styling advice, product availability, or general information.

6. Establish an Online Presence: As Sphere Style has no existing website, this project will create a professional, responsive digital presence from the ground up. (Nottingham, et al., 2002) (Saoula, et al., 2023)

Key Performance Indicators (KPIs):

The following KPIs will be used to measure the success of the website:

KPI	Description	Target
Monthly Visitors	Number of unique users visiting the site per month	+500 within 3 months
Enquiry Submissions	Number of completed enquiry forms submitted	+20 per month
Outfit Views	Number of views on outfit collection and product pages	+300 per month
Average Session Duration	Time spent by users on the website per visit	+2 minutes
Conversion Rate	Percentage of visitors who submit an enquiry or click a product	+5%
Leave Rate	Percentage of users who leave after viewing only one page	Below 50%

Table 1: KPI's Target Table (Help, 2026) (Jr, et al., 2022)

3. Proposed Website Features and Functionalities

The Sphere Style Boutique website will include the following pages with its functional features:

Page	File Name	Description
Homepage	index.html	Hero image, brand introduction, call-to-action buttons, featured outfit collections, and navigation menu
About Us	about.html	Organization history, mission and vision statements, and team introduction
Products	products.html	Full product catalogue with categories, seasonal collections, and outfit combinations
My Cart (Your Purchases)	mycart.html	Full list of items customer has selected to buy based on their liking.
Enquiry	enquiry.html	Customer enquiry form for styling advice, product queries, sizing, and appointment requests
Contact	contact.html	Contact details, store location, embedded map, and contact form

Table 2: The main pages that the website will include

The Key Features with its functionalities:

- Outfit Builder (Deldjoo, et al., 2023)
    - Display curated outfit combinations created from items sold in-store.
    - Organised by seasons: Summer, Winter, Autumn, and Spring collections.
    - Filterable by occasion: Office Wear, Casual Wear, and Formal Wear.
    - Enables staff to reference and present outfit suggestions to customers.
    - Allows enquiries from customers about sizing.

- Product Catalogue
    - Display individual clothing items with the following details:
        - Brand
        - Category (tops, bottoms, shoes, accessories)
        - Size
        - Color
        - Price
        - Optional inventory status indicators show in stock, low stock, or out of stock.

- Outfit Library and Seasonal Collections
    - Summer Collection
    - Winter Collection
    - Office Wear
    - Casual Wear
    - Formal Wear

- Customer Recommendations (Deldjoo, et al., 2023)
    - Staff can use the website to suggest complete outfits based on:
        - Occasion
        - Style preference
        - Season
        - Color preference

- Promotions Section
    - Featured outfit highlights for:
        - Women’s Day campaigns
        - New arrivals
        - Holiday collections
        - Store window displays
- Responsive Navigation
    - A consistent navigation menu accessible across all pages.
    - Mobile-first, hamburger-style menu for smaller screen sizes.

- Contact and Enquiry Forms
    - Enquiry form for products, size and styling requests.
    - Contact form with fields for name, email, subject, and message.
    - Multiple store locations displayed with embedded maps.

4. Design and User Experience

The Design Aesthetic and Branding

The Sphere Style Boutique website will reflect a modern, elegant, and fashion-forward aesthetic that aligns with the boutique's brand identity. The design will prioritize clarity, visual appeal and an ease of use across all devices. (Mondol, et al., 2021)

The Color Scheme

Color	Hex Code	Usage
Black	#000000	Primary text, navigation bar, footer
White	#FFFFFF	Page backgrounds, card backgrounds
Beige / Cream	#F5F0E8	Section backgrounds, soft contrast areas
Accent Gold	#C9A84C	Buttons, highlights, hover states, heading accents
Blue	#90CAF9	Seasonal items in Summer
Red/ Orange	#DD4A48 / #E25E3E	Seasonal items in Autumn
Green	#A1CB35	Seasonal items in Spring
White / Grey	#E8E2DB	Seasonal items in Winter

Table 3: The Color Palette of the Website

The combination of black, white, and beige creates a clean, sophisticated look, while the gold accent adds a premium, boutique quality that reinforces the Sphere Style brand. While the blue, green, red and grey follows the seasonal change across the items. (Campbell, et al., 2024) (Web Content Accessibility Guidelines, 2025)

The Typography

Element	Font	Style
Primary Headings (H1)	Poppins	Bold
Secondary Headings (H2, H3)	Poppins	Semi-Bold
Body Text	Open Sans	Regular
Navigation Links	Poppins	Medium
Buttons / CTAs	Poppins	Bold
Captions / Labels	Open Sans	Light Italic

Table 4: The type of fonts that will be used in the website

Both fonts will be sourced from Google Fonts. The hierarchy establishes a clear visual distinction between headings, body content, and interactive elements.

Layout and Design

The website will follow a modern card-based responsive layout, designed using a mobile-first approach. (Nottingham, et al., 2002) (Weichbroth, 2020)

Key design principles include:

- Grid-based structure for product and outfit display sections.
- Hero sections on the homepage with full-width imagery and overlaid text.
- Card components for products, outfit collections, and promotions.
- Sticky navigation bar for ease of access across all pages.
- White space is used generously to create a premium, uncluttered feel.
- Consistent section layouts across all pages for visual coherence.

User Experience (UX) Considerations

- Navigation:
  - Simple, intuitive top navigation bar with clearly labelled links. Mobile navigation will use a collapsible hamburger menu.

- Accessibility:
  - Accessible color contrast ratios, descriptive alt text for all images, and keyboard-navigable elements. (Droutsas, et al., 2024) (Campbell, et al., 2024)

- Mobile-First Design:
  - All layouts are designed for mobile screens first, then scaled up for tablet and desktop.

- Call-to-Action Buttons:
  - Prominent call-to-action buttons such as Shop Now, View Collections, and Enquire Today are placed strategically on each page.

- Loading Performance:
  - Optimized images and minimal use of external scripts to ensure fast page loading. (Xilogianni, et al., 2022)

- Consistent Branding:
  - Uniform use of the color scheme, typography, and visual style across all pages. (Saoula, et al., 2023) (Weichbroth, 2020)

Low-Fidelity Wireframes

The following low-fidelity wireframes outline the layout and information hierarchy for each key page:

The colour palette combination of black, white, and beige creates a clean, sophisticated look, while the gold accent adds a premium, boutique quality that reinforces the Sphere Style brand. While the blue, green, red and grey follows the seasonal change across the items.

5. Technical Requirements

Programming Languages and Frameworks

Technology	Purpose
HTML5	Page structure and semantic markup for all web pages
CSS3	Styling, layout, animations, and responsive design
JavaScript (Vanilla)	Interactive features including navigation, outfit filters, and form validation
Local Storage / JSON	Client-side data persistence for outfit collections and product details
Google Fonts	Web typography — Poppins and Open Sans
Font Awesome / SVG Icons	Iconography for navigation, social media links, and UI elements

Table 5: The Programming Languages and their purpose

Hosting and Domain Requirements

Requirement	Details
Hosting Type	Shared web hosting
Recommended Hosting Provider	Afrihost / Xneelo (South African-based hosting)
Domain Name	www.spherestyle.com
Domain Extension	.co.za (South African domain, appropriate for local boutique)
SSL Certificate	Required — to ensure secure HTTPS connection
Storage Required	Minimum 2 GB for images, files, and HTML/CSS/JS assets
Bandwidth	Unmetered or minimum 10 GB/month

Table 6: Hosting and Domain Requirements (Saoula, et al., 2023)

File and Folder Structure

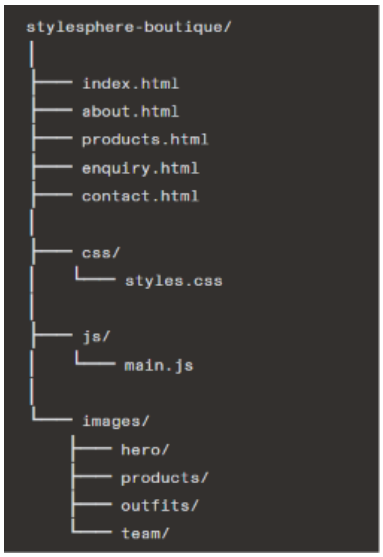

Figure 6: File Structure

6. Timeline and Milestones

The following project timeline outlines the key milestones for the development of the Sphere Style Boutique website, aligned with the subject's submission schedule: (Gómez, et al., 2014)

Week	Milestone	Deliverables
Week 1	Project Proposal	Completed and submitted Website Project Proposal document
Week 2	Content Research and Sitemap	Researched content gathered, sitemap created, file structure established
Week 3	HTML Pages	All 5 HTML pages created with basic structure and content integration
Week 4	CSS Styling	Full stylesheet applied — layout, color scheme, typography, responsive design
Week 5	JavaScript Functionality	Navigation, form validation, outfit filters, and interactive elements implemented
Week 6	Testing and Final Submission	Cross-browser testing, debugging, final review, and submission

Table 7: Timeline of creating the website

7. Budget

The following budget estimate is based on realistic market research for website development, hosting, and maintenance costs within the South African context for a small boutique retail business:

Item	Estimated Cost	Frequency
Website Design and Development	R 16 500.00	Once-off
Shared Web Hosting (Xneelo/Afrihost)	R 2 500.00	Per year + 10 % annual increase
Domain Registration (.co.za)	R 150.00	Per year + 10 % annual increase Per year
SSL Certificate	R 500.00	Per year + 10 % annual increase
Website Maintenance and Updates	R 5 400.00	Per year + 10 % annual increase
Image Licensing / Stock Photography	R 800.00	Per year + 10 % annual increase
Total Initial Cost	**R 25 850.00**	**N/A**
Total Annual Running Cost	**R 7 250.00**	**Per year**

Table 8: Budget Estimation for the Website
